

Julia Yang

Seattle, WA • (206) 931-1721 • yangpeirang10140@gmail.com • <https://pei1230.github.io/juliayang/>

EDUCATION

UNIVERSITY OF WASHINGTON, Seattle, WA

June 2027

B.S. Informatics: Data Science | Minor: Business Administration | GPA: 3.7/4.0

Dean's List all quarters; relevant coursework: Data Science Core Methods, Computer Programming Series, Client-Side Development, Databases & Data Modeling, Linear Algebra, Product & Information Systems Management, Research Methods, Calculus I & II

WORK EXPERIENCE

DIAMOND DESIGN JAPAN, Tokyo, Japan

July 2025 - Present

Brand Identity Designer & Web Developer

- Built and launched a multilingual website solo for a 6-room boutique hotel (almeria.co.jp), driving a 130% increase in sessions and 5,000+ domestic and international visitors tracked via Google Analytics
- Designed 20+ logo iterations solo, delivering a final minimal modern brand identity applied across all hotel products; led corporate website development, launched November 2025
- Partnered with business owner to shape company vision and brand strategy, creating 20+ logo iterations before finalizing a minimal, modern identity applied across all products.

PROJECTS

COMPAS Algorithmic Fairness Audit, Seattle, WA

March 2026

Data Science Core Methods | R, tidyverse, ggplot2

- Audited the COMPAS recidivism prediction algorithm across 6,172 defendants, computing confusion matrices, FPR, FNR, and precision, segmented by race
- Quantified racial disparity: Black defendants had a 42% false positive rate vs. 22% for white defendants, and a 28% false negative rate vs. 50%, revealing opposite error profiles by race
- Evaluated competing fairness definitions (predictive parity vs. error rate parity) and analyzed trade-offs for real-world criminal sentencing applications

U.S. Election Outcome Prediction – Logistic Regression, Seattle, WA

February 2026

Data Science Core Methods | R, tidyverse, glm, margins

- Cleaned and engineered features from a 43,602-row U.S. election dataset (2000–2024), imputing missing income and population values via FIPS-grouped forward/backward fill
- Built a logistic regression model predicting 2020 county-level Democratic wins across 3,051 counties using population density, income, education, birth rate, and census region
- Found population density and college education rate as the strongest predictors: +1,000 people/sq mi raised Democratic win probability by 22.8%; each 1% point increase in college graduates added 4.9%

LEADERSHIP EXPERIENCE

UNITE UW, Seattle, WA

September 2025 - March 2026

Facilitator | Program Photographer & Social Media Team

- Facilitate weekly sessions for a 5-person group spanning 4 nationalities; produce Instagram content and event materials that support outreach to 100+ program participants

THE SOCIAL ENTREPRENEURSHIP PROJECT, Tokyo, Japan

September 2022 - May 2024

Treasurer

- Oversaw budgeting and financial strategy for a student-led initiative expanding education access in Papua New Guinea, ensuring funds were allocated for school supplies, facilities, and cultural exchange programs.
- Co-led a team of 13 members, raising over 300,000 yen in funding and scaling operations into three international teams supporting multiple countries.

SKILLS & INTERESTS

- **Languages:** Mandarin Chinese (Native) · English (Native) · Japanese (Full Professional)
- **Programming:** Python · R · SQL · Java · JavaScript · HTML/CSS
- **Tools & Tech:** Git · tidyverse · ggplot2 · Figma · WordPress · Excel · React · Data Visualization · Statistical Modeling
